Notes to Financial Statements

Schedule E-9

Page 1 of 4

Line  
No.

**Following are the significant accounting policies for Global Water. Please note that some of these accounting policies may only be applicable to the parent company, GWRI.**

**Basis of Presentation and Principles of Consolidation**

The Company's financial statements have been prepared in accordance with accounting principles generally accepted in the United States of America ("GAAP").

The Company prepares its financial statements in accordance with the rules and regulations of the Securities and Exchange Commission ("SEC"). The preparation of the financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of income and expenses during the reporting period. Actual results could differ from those estimates.

The Company qualifies as an "emerging growth company", as defined in the Jumpstart Our Business Startups Act of 2012 (the "JOBS Act"), under the rules and regulations of the SEC. An emerging growth company may take advantage of specified reduced reporting and other requirements that are otherwise applicable generally to public companies. The Company has elected to take advantage of these provisions for up to five years or such earlier time that the Company is no longer an emerging growth company. The Company has elected to take advantage of some of the reduced disclosure obligations regarding financial statements. Also, as an emerging growth company, the Company can elect to delay adopting new or revised accounting standards issued subsequent to the enactment of the JOBS Act until such time as those standards apply to private companies. The Company has chosen to take advantage of this extended accounting transition provision.

**Significant Accounting Policies***Regulation*

Our regulated utilities and certain other balances are subject to regulation by the ACC and are therefore subject to Accounting Standards Codification Topic 980, *Regulated Operations* ("ASC 980").

*Property, plant, and equipment*

Property, plant, and equipment is stated at cost less accumulated depreciation provided on a straight-line.

Depreciation rates for asset classes of utility property, plant, and equipment are established by the ACC. The cost of additions, including betterments and replacements of units of utility fixed assets are charged to utility property, plant, and equipment. When units of utility property are replaced, renewed, or retired, their cost plus removal or disposal costs, less salvage proceeds, is charged to accumulated depreciation.

For non-utility property, plant, and equipment, depreciation is calculated by the straight-line method over the estimated useful lives of depreciable assets. Cost and accumulated depreciation for non-utility property, plant, and equipment retired or disposed of are removed from the accounts and any resulting gain or loss is included in earnings.

In addition to third party costs, direct personnel costs and indirect construction overhead costs may be capitalized. Interest incurred during the construction period is also capitalized as a component of the cost of the constructed assets, which represents the cost of debt associated with construction activity. Expenditures for maintenance and repairs are charged to expense.

*Revenue Recognition—Water Services*

Water services revenues are recorded when service is rendered, or water is delivered to customers. However, in addition to the monthly basic service charge, the determination and billing of water sales to individual customers is based on the reading of their meters, which occurs on a systematic basis throughout the month. At the end of each reporting period, amounts of water delivered to customers since the date of the last meter reading are estimated and the corresponding unbilled revenue is recorded.

Water connection fees are the fees associated with the application process to set up a customer to receive utility service on an existing water meter. These fees are approved by the ACC through the regulatory process and are set based on the costs incurred to establish services including the application process, billing setup, initial meter reading, and

**Global Water - Eagletail Water Company, Inc.**

Test Year Ended December 31, 2019

Notes to Financial Statements

Schedule E-9

Page 2 of 4

Line  
No.

1 service transfer. Because the amounts charged for water connection fees are set by our regulator and not  
2 negotiated in conjunction with the pricing of ongoing water service, the connection fees represent the  
3 culmination of a separate earnings process and are recognized when the service is provided.  
4 Meter installation fees are the fees charged to developers or builders associated with installing new water  
5 meters. Certain fees for meters are regulated by the ACC and are refundable to the end customer over a period  
6 of time. Refundable meter installation fees are recorded as a liability upon receipt. These fees are recognized  
7 as revenue when the service is rendered, or when a water meter is installed.  
8 *Revenue Recognition—Wastewater and Recycled Water Services*  
9 Wastewater service revenues are generally recognized when service is rendered. Wastewater services are  
10 billed at a fixed monthly amount per connection, and recycled water services are billed monthly based on  
11 volumetric fees.  
12 *Revenue Recognition—Unregulated Revenues*  
13 Unregulated Revenues represent those revenues that are not subject to the ratemaking process of the  
14 ACC. Unregulated revenues are limited to rental revenue and imputed revenues resulting from certain  
15 infrastructure coordination and financing agreement arrangements ("ICFAs").  
16 *Allowance for Doubtful Accounts*  
17 Provisions are made for doubtful accounts due to the inherent uncertainty around the collectability of accounts  
18 receivable. The allowance for doubtful accounts is recorded as bad debt expense, and is classified as general  
19 and administrative expense. The allowance for doubtful accounts is determined considering the age of the  
20 receivable balance, type of customer (e.g., residential or commercial), payment history, as well as specific  
21 identification of any known or expected collectability issues.  
22 *Cash and Cash Equivalents*  
23 Cash and cash equivalents include all highly liquid investments in debt instruments with an original maturity of  
24 three months or less.  
25 *Restricted Cash*  
26 Restricted cash represents cash deposited relating to HUF tariffs, asset retirement obligations and pending  
27 legal matters. *Income Taxes*  
28 The Company utilizes the asset and liability method of accounting for income taxes. Under the asset and  
29 liability method, deferred tax assets and liabilities are recognized for the future tax consequences attributable  
30 to differences between the financial statement carrying amounts of existing assets and liabilities and their  
31 respective tax bases. Deferred tax assets and liabilities are measured using enacted tax rates expected to apply  
32 to taxable income in the years in which those temporary differences are expected to be recovered or settled.  
33 Deferred tax assets are reduced by a valuation allowance when, in the opinion of management, it is more likely  
34 than not that some portion or all of the deferred tax assets will not be realized.

We evaluate uncertain tax positions using a two-step approach. Recognition (step one) occurs when we conclude that a tax position, based solely on its technical merits, is more-likely-than-not to be sustained upon examination. Measurement (step two) determines the amount of benefit that more-likely-than-not will be realized upon settlement. Derecognition of a tax position that was previously recognized would occur when we subsequently determine that a tax position no longer meets the more-likely-than-not threshold of being sustained. The use of a valuation allowance as a substitute for derecognition of tax positions is prohibited, and to the extent that uncertain tax positions exist, we provide expanded disclosures.

*Goodwill*

Goodwill represents the excess purchase price over the fair value of net tangible and identifiable intangible assets acquired through acquisitions. Goodwill is not amortized, it is instead tested for impairment annually, or more often, if circumstances indicate a possible impairment may exist. As required, we evaluate goodwill for impairment annually, and do so as of November 1 of each year, and at an interim date if indications of impairment exist. When testing goodwill for impairment, we may assess qualitative factors, including macroeconomic conditions, industry and market considerations, overall financial performance, and entity specific events to determine whether it is more likely than not that the fair value of an operating and reportable segment is less than its carrying amount. We utilize internally developed discounted future cash flow models, third-party appraisals, or broker valuations to determine the fair value of the reporting unit. Under the discounted cash flow approach, we utilize various assumptions requiring judgment, including projected future cash flows, discount rates, and capitalization rates. Our estimated future cash flows are based on historical data, internal estimates, and external sources. We then compare the estimated fair value to the carrying value. If the carrying value is in excess of the fair value, an impairment charge is recorded to asset impairments within our consolidated statement of operations in the amount by which the reporting unit's carrying value exceeds its fair value, limited to the carrying value of goodwill.

*Intangible Assets*

Intangible assets not subject to amortization consist of certain permits expected to be renewable indefinitely, water rights and certain service areas acquired in transactions which did not meet the definition of business combinations for accounting purposes, and are considered to have indefinite lives. Intangible assets with indefinite lives are not amortized but are tested for impairment annually, or more often if certain circumstances indicate a possible impairment may exist. Amortized intangible assets consist primarily of acquired ICFA contract rights.

*Debt Issuance Costs*

In connection with the issuance of some of our long-term debt, we have incurred legal and other costs that we believe are directly attributable to realizing the proceeds of the debt issued. These costs are netted against long-term debt and amortized as interest expense using the effective interest method over the term of the respective debt.

*Impairment of Long-Lived Assets*

Management evaluates the carrying value of long-lived assets for impairment whenever events or changes in circumstances indicate that the carrying value of such assets may not be recoverable. If an indicator of possible impairment exists, an undiscounted cash flow analysis would be prepared to determine whether there is an actual impairment. Measurement of the impairment loss is based on the fair value of the asset. Generally, fair value will be determined using appraisals or valuation techniques such as the present value of expected future cash flows.

58*Advances and Contributions in Aid of Construction*

The Company has various agreements with developers and builders, whereby funds, water line extensions, or wastewater line extensions are provided to us by the developers and are considered refundable advances for construction. These AIAC are non-interest-bearing and are subject to refund to the developers through annual payments that are computed as a percentage of the total annual gross revenue earned from customers connected to utility services constructed under the agreement over a specified period. Upon the expiration of the agreements' refunding period, the remaining balance of the advance becomes nonrefundable and at that time is considered CIAC. CIAC are amortized as a reduction of depreciation expense over the estimated remaining life of the related utility plant. For rate-making purposes, utility plant funded by AIAC or CIAC are generally excluded from rate base.

*Fair Value of Financial Instruments*

The carrying values of cash equivalents, trade receivables, and accounts payable approximate fair value due to the short-term maturities of these instruments. Portions of these non-interest-bearing instruments are payable annually through 2032 and amounts not paid by the contract expiration dates become nonrefundable. Their relative fair values cannot be accurately estimated because future refund payments depend on several variables, including new customer connections, customer consumption levels, and future rate increases. However, the fair value of these amounts would be less than their carrying value due to the non-interest-bearing feature.

*Segments*

Operating segments are defined as components of an enterprise about which separate financial information is available that is evaluated regularly by the chief operating decision maker ("CODM") in deciding how to allocate resources and in assessing operating performance. In consideration of ASC 280—*Segment Reporting* the Company notes it is not organized around specific products and services, geographic regions, or regulatory environments. The Company currently operates in one geographic region within the State of Arizona, wherein each operating utility operates within the same regulatory environment.

While the Company reports its revenue, disaggregated by service type, on the face of its Statements of Operations, the Company does not manage the business based on any performance measure at the individual revenue stream level. The Company does not have any customers that contribute more than 10% to the Company's revenues or revenue streams. Additionally, we note that the CODM uses consolidated financial information to evaluate the Company's performance, which is the same basis on which he communicates the Company's results and performance to the Board of Directors. It is upon this consolidated basis from which he bases all significant decisions regarding the allocation of the Company's resources on a consolidated level. Based on the information described above and in accordance with the applicable literature, management has concluded that the Company is currently organized and operated as one operating and reportable segment.

Revenues and expenses were projected using the pro forma changes to the test year ending December 31, 2019. Actual expenses incurred during the test year ending December 31, 2019, were considered when developing pro forma adjustments. Where known and measurable changes are expected to occur, those changes are applied to determine pro form adjustments.

Construction forecasts are based on estimated plant requirements including new facilities, the replacement of existing facilities, and the improvement and maintenance of infrastructure necessary to ensure safe and reliable service.

**Following are the significant accounting policies for Global Water. Please note that some of these accounting policies may only be applicable to the parent company, GWRI.**

**Basis of Presentation and Principles of Consolidation**

The Company's financial statements have been prepared in accordance with accounting principles generally accepted in the United States of America ("GAAP").

The Company prepares its financial statements in accordance with the rules and regulations of the Securities and Exchange Commission ("SEC"). The preparation of the financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of income and expenses during the reporting period. Actual results could differ from those estimates.

The Company qualifies as an "emerging growth company", as defined in the Jumpstart Our Business Startups Act of 2012 (the "JOBS Act"), under the rules and regulations of the SEC. An emerging growth company may take advantage of specified reduced reporting and other requirements that are otherwise applicable generally to public companies. The Company has elected to take advantage of these provisions for up to five years or such earlier time that the Company is no longer an emerging growth company. The Company has elected to take advantage of some of the reduced disclosure obligations regarding financial statements. Also, as an emerging growth company, the Company can elect to delay adopting new or revised accounting standards issued subsequent to the enactment of the JOBS Act until such time as those standards apply to private companies. The Company has chosen to take advantage of this extended accounting transition provision.

**Significant Accounting Policies**

*Regulation*

Our regulated utilities and certain other balances are subject to regulation by the ACC and are therefore subject to Accounting Standards Codification Topic 980, *Regulated Operations* ("ASC 980").

*Property, plant, and equipment*

Property, plant, and equipment is stated at cost less accumulated depreciation provided on a straight-line. Depreciation rates for asset classes of utility property, plant, and equipment are established by the ACC. The cost of additions, including betterments and replacements of units of utility fixed assets are charged to utility property, plant, and equipment. When units of utility property are replaced, renewed, or retired, their cost plus removal or disposal costs, less salvage proceeds, is charged to accumulated depreciation. For non-utility property, plant, and equipment, depreciation is calculated by the straight-line method over the estimated useful lives of depreciable assets. Cost and accumulated depreciation for non-utility property, plant, and equipment retired or disposed of are removed from the accounts and any resulting gain or loss is included in earnings.

In addition to third party costs, direct personnel costs and indirect construction overhead costs may be capitalized. Interest incurred during the construction period is also capitalized as a component of the cost of the constructed assets, which represents the cost of debt associated with construction activity. Expenditures for maintenance and repairs are charged to expense.

*Revenue Recognition—Water Services*

Water services revenues are recorded when service is rendered, or water is delivered to customers. However, in addition to the monthly basic service charge, the determination and billing of water sales to individual customers is based on the reading of their meters, which occurs on a systematic basis throughout the month. At the end of each reporting period, amounts of water delivered to customers since the date of the last meter reading are estimated and the corresponding unbilled revenue is recorded.

Water connection fees are the fees associated with the application process to set up a customer to receive utility service on an existing water meter. These fees are approved by the ACC through the regulatory process and are set based on the costs incurred to establish services including the application process, billing setup, initial meter reading, and

## Greater Tonopah Water Company\_Eagletail Water Company\_North Scottsdale Water Company Consolidated

Notes to Financial Statements

Schedule E-9

Page 1 of 2

Line  
No.

1 service transfer. Because the amounts charged for water connection fees are set by our regulator and not  
2 negotiated in conjunction with the pricing of ongoing water service, the connection fees represent the  
3 culmination of a separate earnings process and are recognized when the service is provided.  
4 Meter installation fees are the fees charged to developers or builders associated with installing new water  
5 meters. Certain fees for meters are regulated by the ACC and are refundable to the end customer over a  
6 period of time. Refundable meter installation fees are recorded as a liability upon receipt. These fees are  
7 recognized as revenue when the service is rendered, or when a water meter is installed.  
8 *Revenue Recognition—Wastewater and Recycled Water Services*  
9 Wastewater service revenues are generally recognized when service is rendered. Wastewater services are  
10 billed at a fixed monthly amount per connection, and recycled water services are billed monthly based on  
11 volumetric fees.  
12 *Revenue Recognition—Unregulated Revenues*  
13 Unregulated Revenues represent those revenues that are not subject to the ratemaking process of the  
14 ACC. Unregulated revenues are limited to rental revenue and imputed revenues resulting from certain  
15 infrastructure coordination and financing agreement arrangements ("ICFAs").  
16 *Allowance for Doubtful Accounts*  
17 Provisions are made for doubtful accounts due to the inherent uncertainty around the collectability of  
18 accounts receivable. The allowance for doubtful accounts is recorded as bad debt expense, and is classified as  
19 general and administrative expense. The allowance for doubtful accounts is determined considering the age of  
20 the receivable balance, type of customer (e.g., residential or commercial), payment history, as well as specific  
21 identification of any known or expected collectability issues.  
22 *Cash and Cash Equivalents*  
23 Cash and cash equivalents include all highly liquid investments in debt instruments with an original maturity of  
24 three months or less.  
25 *Restricted Cash*  
26 Restricted cash represents cash deposited relating to HUF tariffs, asset retirement obligations and pending  
27 legal matters. *Income Taxes*  
28 The Company utilizes the asset and liability method of accounting for income taxes. Under the asset and  
29 liability method, deferred tax assets and liabilities are recognized for the future tax consequences attributable  
30 to differences between the financial statement carrying amounts of existing assets and liabilities and their  
31 respective tax bases. Deferred tax assets and liabilities are measured using enacted tax rates expected to  
32 apply to taxable income in the years in which those temporary differences are expected to be recovered or  
33 settled. Deferred tax assets are reduced by a valuation allowance when, in the opinion of management, it is  
34 more likely than not that some portion or all of the deferred tax assets will not be realized.

## Greater Tonopah Water Company\_Eagletail Water Company\_North Scottsdale Water Company Consolidated

Test Year Ended December 31, 2019

Notes to Financial Statements

Schedule E-9

Page 1 of 3

Line  
No.

We evaluate uncertain tax positions using a two-step approach. Recognition (step one) occurs when we conclude that a tax position, based solely on its technical merits, is more-likely-than-not to be sustained upon examination. Measurement (step two) determines the amount of benefit that more-likely-than-not will be realized upon settlement. Derecognition of a tax position that was previously recognized would occur when we subsequently determine that a tax position no longer meets the more-likely-than-not threshold of being sustained. The use of a valuation allowance as a substitute for derecognition of tax positions is prohibited, and to the extent that uncertain tax positions exist, we provide expanded disclosures.

*Goodwill*

Goodwill represents the excess purchase price over the fair value of net tangible and identifiable intangible assets acquired through acquisitions. Goodwill is not amortized, it is instead tested for impairment annually, or more often, if circumstances indicate a possible impairment may exist. As required, we evaluate goodwill for impairment annually, and do so as of November 1 of each year, and at an interim date if indications of impairment exist. When testing goodwill for impairment, we may assess qualitative factors, including macroeconomic conditions, industry and market considerations, overall financial performance, and entity specific events to determine whether it is more likely than not that the fair value of an operating and reportable segment is less than its carrying amount. We utilize internally developed discounted future cash flow models, third-party appraisals, or broker valuations to determine the fair value of the reporting unit. Under the discounted cash flow approach, we utilize various assumptions requiring judgment, including projected future cash flows, discount rates, and capitalization rates. Our estimated future cash flows are based on historical data, internal estimates, and external sources. We then compare the estimated fair value to the carrying value. If the carrying value is in excess of the fair value, an impairment charge is recorded to asset impairments within our consolidated statement of operations in the amount by which the reporting unit's carrying value exceeds its fair value, limited to the carrying value of goodwill.

*Intangible Assets*

Intangible assets not subject to amortization consist of certain permits expected to be renewable indefinitely, water rights and certain service areas acquired in transactions which did not meet the definition of business combinations for accounting purposes, and are considered to have indefinite lives. Intangible assets with indefinite lives are not amortized but are tested for impairment annually, or more often if certain circumstances indicate a possible impairment may exist. Amortized intangible assets consist primarily of acquired ICFA contract rights.

*Debt Issuance Costs*

In connection with the issuance of some of our long-term debt, we have incurred legal and other costs that we believe are directly attributable to realizing the proceeds of the debt issued. These costs are netted against long-term debt and amortized as interest expense using the effective interest method over the term of the respective debt.

*Impairment of Long-Lived Assets*

Management evaluates the carrying value of long-lived assets for impairment whenever events or changes in circumstances indicate that the carrying value of such assets may not be recoverable. If an indicator of possible impairment exists, an undiscounted cash flow analysis would be prepared to determine whether there is an actual impairment. Measurement of the impairment loss is based on the fair value of the asset. Generally, fair value will be determined using appraisals or valuation techniques such as the present value of expected future cash flows.

58*Advances and Contributions in Aid of Construction*

The Company has various agreements with developers and builders, whereby funds, water line extensions, or wastewater line extensions are provided to us by the developers and are considered refundable advances for construction. These AIAC are non-interest-bearing and are subject to refund to the developers through annual payments that are computed as a percentage of the total annual gross revenue earned from customers connected to utility services constructed under the agreement over a specified period. Upon the expiration of the agreements' refunding period, the remaining balance of the advance becomes nonrefundable and at that time is considered CIAC. CIAC are amortized as a reduction of depreciation expense over the estimated remaining life of the related utility plant. For rate-making purposes, utility plant funded by AIAC or CIAC are generally excluded from rate base.

*Fair Value of Financial Instruments*

The carrying values of cash equivalents, trade receivables, and accounts payable approximate fair value due to the short-term maturities of these instruments. Portions of these non-interest-bearing instruments are payable annually through 2032 and amounts not paid by the contract expiration dates become nonrefundable. Their relative fair values cannot be accurately estimated because future refund payments depend on several variables, including new customer connections, customer consumption levels, and future rate increases. However, the fair value of these amounts would be less than their carrying value due to the non-interest-bearing feature.

*Segments*

Operating segments are defined as components of an enterprise about which separate financial information is available that is evaluated regularly by the chief operating decision maker ("CODM") in deciding how to allocate resources and in assessing operating performance. In consideration of ASC 280—*Segment Reporting* the Company notes it is not organized around specific products and services, geographic regions, or regulatory environments. The Company currently operates in one geographic region within the State of Arizona, wherein each operating utility operates within the same regulatory environment. While the Company reports its revenue, disaggregated by service type, on the face of its Statements of Operations, the Company does not manage the business based on any performance measure at the individual revenue stream level. The Company does not have any customers that contribute more than 10% to the Company's revenues or revenue streams. Additionally, we note that the CODM uses consolidated financial information to evaluate the Company's performance, which is the same basis on which he communicates the Company's results and performance to the Board of Directors. It is upon this consolidated basis from which he bases all significant decisions regarding the allocation of the Company's resources on a consolidated level. Based on the information described above and in accordance with the applicable literature, management has concluded that the Company is currently organized and operated as one operating and reportable segment.

Revenues and expenses were projected using the pro forma changes to the test year ending December 31, 2019. Actual expenses incurred during the test year ending December 31, 2019, were considered when developing pro forma adjustments. Where known and measurable changes are expected to occur, those changes are applied to determine pro form adjustments.

Construction forecasts are based on estimated plant requirements including new facilities, the replacement of existing facilities, and the improvement and maintenance of infrastructure necessary to ensure safe and reliable service.

Water Utility Plant Description (Continued)
---

For the following three items, list the utility owned assets in each category for each system.

TREATMENT EQUIPMENT:	Chlorine Injection at well
STRUCTURES:	Shed at water distribution center; Fence around water distribution center; Shed for chlorine storage
OTHER:	N/A

Provide a calculation used to determine the value of one water equivalent residential connection (ERC).

Use one of the following methods:

- (a) If actual flow data are available from the preceding 12 months, divide the total annual single family residence (SFR) gallons sold by the average number of single family residence customers for the same period and divide the result by 365
- (b) If no historical flow data are available, use:  

$$ERC = ( \text{Total SFR gallons sold (Omit 000)} / 365 \text{ days} / 350 \text{ gallons per day} )$$

ERC	171
Method used:	(a)

## TARIFF SCHEDULE

Utility: Eagletail Water Company Tariff Sheet No.: 1 of 2  
 Docket No.: W-03936A-01-0886 Decision No.: \_\_\_\_\_  
 Phone No.: (928) 372-2236 Effective: \_\_\_\_\_

**CURTAILMENT PLAN FOR EAGLETAIL WATER COMPANY:**

ADEQ Public Water System Number: 7032

The Company is authorized to curtail water service, to all customers, residential and commercial, within its certificated area under the following terms and conditions:

**Stage 1 Exists When:**

1. The Company is able to maintain water storage in the system at 100 percent capacity and there are no known problems with its well production or water storage in the system.

Restrictions: Under Stage 1, the company is deemed to be operating normally and no curtailment is necessary.

Notice Requirements: Under Stage 1, no notice is necessary.

**Stage 2 Exists When:**

1. The Company's total storage and well production has been less than 80 percent of capacity for at least 48 consecutive hours, and
2. The Company has identified issues such as steadily declining water table, an increased draw-down threatening pump operations, poor water production creating a reasonable belief the Company will be unable to meet anticipated water demands in the system.

Restrictions: Under Stage 2, the Company may request the customers to voluntarily employ water conservation measures to reduce water consumption by approximately 50 percent. Outside watering should be limited to essential water, dividing outside watering on some uniform basis (such as even and odd days) and eliminating outside watering on weekends and holidays.

Notice Requirements: Under Stage 2, the Company is required to notify customers by delivering written notice door to door at each service address, or by United States first class mail to the billing address or, at the Company's option both. Such notice shall notify the customers of the general nature of the problem and the need to conserve water.

**Stage 3 Exists When:**

1. The Company's total storage and well production has been less than 50 percent for at least 24 consecutive hours. The Company has identified issues such as a steadily declining water table, and increased draw down threatening pump operations creating a reasonable belief the Company will be unable to meet anticipated water demand on a sustained basis. The Company must rely on hauling to augment the minimum needs of the customers.

Restrictions: Under Stage 3, the Company shall request the customer to voluntarily employ water conservation measures to reduce daily consumption by approximately 50 percent. All outside watering should be eliminated, except livestock, and indoor water conservation techniques should be employed whenever possible.

## TARIFF SCHEDULE (CONTINUED)

Utility: Eagletail Water Company  
 Docket No.: W-03936A-01-0886  
 Phone No.: (928) 372-2236

Tariff Sheet No.: 2 of 2  
 Decision No.: \_\_\_\_\_  
 Effective: \_\_\_\_\_

**Stage 3 Exists When: (continued) (PWS-Number 7032 )**Notice Requirements:

- a. The Company is required to notify customers by delivering written notice to each service address, or by United States first class mail to the billing address or, at the Company's option both. Such Notice shall notify the customers of the general nature of the problem and the need to conserve water.
- b. Beginning with Stage 3, the Company shall post a sign showing curtailment stage. Signs shall be posted at the well site.
- c. The Company shall notify the Consumer Services Section of the utilities Division of the Corporation Commission at least 12 hours prior to entering stage 3.

**Stage 4 Exists When:**

1. The Company's total storage has been less than 25 percent for at least 12 consecutive hours. The Company has identified issues such as a steadily declining water table, and increased draw down threatening pump operations creating a reasonable belief the Company will be unable to meet anticipated water demand on a sustained basis. The Company must rely on an emergency hauling to augment the minimum needs to the customers.

Restrictions: Under Stage 4, the Company shall inform the customers of a **Mandatory** restriction to employ water conservation measures to reduce daily consumption. Failure to comply will result in customer disconnection. The following uses of water shall be prohibited:

- Irrigation of outdoor lawns, trees, shrubs, or any plant life is prohibited
- Washing of any vehicle is prohibited
- The use of water for dust control or any outdoor cleaning uses is prohibited
- The use of drip or misting systems of any kind is prohibited
- The filling of any swimming pools, spas, fountains, or ornamental ponds is prohibited
- Restaurant patrons shall serve water only upon request
- Any other water intensive activity shall be prohibited

Notice Requirements:

- a. The Company is required to notify customers by delivering written notice to each service address, or by United States first class mail to the billing address or, at the Company's option, both.
- b. The Company shall have posted a sign showing curtailment stage. Signs shall be posted at the well site.
- c. The Company shall notify the Consumer Services Section of the Utilities Division of the Corporation Commission at least 12 hours prior to entering stage 4.

Customers who fail to comply with cessation of outdoor use provisions will be given written notice to end all outside use. Failure to comply with in two (2) working days of receipt of the notice will result in temporary loss of service until agreement can be made to end unauthorized use of outside water. To restore service, the customer shall be required to pay all authorized reconnection fees.
